Secure Systems & Technologies Reports Latest Contract Win Worth over €2 Million

SST clocks up another win for its TEMPEST and Rugged solutions, a contract with the Council of Europe

Gloucester, UK: Specialist defence and security IT manufacturer, Secure Systems & Technologies, (SST) reports a major contract win for its specialist TEMPEST IT hardware products and Military Rugged solutions. The Council of Europe has awarded SST with an initial two-year contract worth over €2 million to supply fully rugged TEMPEST laptops, together with a renewable four-year maintenance and support contract.

The Council of Europe project involves the supply of a Rugged (MIL-STD-810F) TEMPEST (SDIP-27 Level A) laptop computer. SST was awarded the contract after a competitive tender, demonstrating compliance with the Council of Europe's stringent requirements for system performance and support. Over 9 years the company has worked closely with the Council of Europe, supplying a significant proportion of its TEMPEST infrastructure across desktop PCs, monitors, printers, scanners and peripherals.

Comment

Managing Director Mathew Richards commented on the company's latest success:

"We are experiencing a strong period of sales activity, across all aspects of SST's specialist business.

The TEMPEST contract with the Council of Europe is a significant win, reflecting SST's close understanding of the Council's requirements, and our ability to deliver a competitive technical solution. We will be supplying the new laptops across an initial two-year period, backed up by our comprehensive support and maintenance service.

With recent contract wins totalling over £2.5M, SST is steadily growing its business, based on a reputation for engineering excellence matched by integration expertise and service."

About SST

Established in 2002 as the product of two synergistic organisations, Secure Computer Systems Ltd and Secure Systems Production Ltd, SST operates to ISO 9001 standards. Its comprehensive service set includes a dedicated engineering and test division, matched by consultancy and training facilities, majoring on COMSEC and EMSEC requirements.

SST's emphasis is on providing state of the art solutions from concept to deployment, with its design and development facilities backed up by a specialist service organisation. Combined with dynamic Service Partner Agreements, SST maintains full service coverage across the European and NATO theatres.

SST's success is substantially based on its long-standing ability to deliver a complete end-to-end service. This is achieved by working in partnership with its customers, major prime contractors and global IT product leaders - identifying and adapting current technologies, and creating individual solutions that meet a project's stringent requirements for data security.

A critical element of SST's philosophy involves managing obsolescence effectively, ensuring that customers receive lifetime product support. SST employs a high percentage of skilled staff comprising Subject Matter Experts, highly qualified consultant engineers, designers and expert technicians, operating from a purpose-built facility on the outskirts of Gloucester.
