

TEMPEST Testers Advanced Course

Secure Systems & Technologies Ltd (SST) operates a purpose built CESG accredited screened room testing facility in Gloucester (UK). With experience spanning three decades SST (www.sst.ws) is uniquely positioned to support your TEMPEST training needs.

Summary of Course Objectives:

To provide in—depth theoretical and practical appreciation of signal detection and analysis associated with new technologies and their signals. This course provides an ideal opportunity for experienced testers to update their knowledge and to become competent with new technologies and equipment.

Summary of Programme:

- Modern detection systems
- Equipment and network testing
- Analysis of signals

There is a theory and practical examination at the end of the course.

An Advanced TEMPEST Testers Certificate will be issued on successful completion of this course.

Target Audience: TEMPEST testers

To be eligible to attend you must be:

- a UK citizen
- employed by a UK public body, or a private sector organisation which has a contract, on which you are working, with a UK Government department
- working in a role which requires you to have access to NATO TEMPEST policy standards

Attendance Prerequisites:

Minimum Security Clearance: SC

Successful completion of the SST TEMPEST Testers Basic Onsite Course and at least one years experience in TEMPEST testing are recommended as a pre-requisite for attendance on this course
